EXPERIENCE

DRUPAL EXPERT APPLICATIONS DEVELOPER

Nestle | 03/2023 – Today

- Led the technical vision for **200+ Drupal websites** in North American, optimizing architecture, security, and performance, ensuring performance standards, reducing security incidents to 0.
- Orchestrated migrations, go-lives, and integrations across PaaS (**Pantheon.io**, Acquia, Platform.sh) of 50+ brand sites, ensuring 100% compliance with **security & compliance** (FoD, New Relic), and **accessibility** (WCAG, Deque Axe) standards.
- Enhanced user engagement and SEO by implementing **GenAI-driven personalization**, driving a 15% boost in user engagement and a 35% improvement in search rankings, and reducing bounce rates.
- Drove DevOps efficiency by optimizing **CI/CD pipelines** (**Pantheon WebOps**, GitHub Actions, Azure DevOps) and implementing automated testing, reducing deployment time by 40%.
- Resolved complex production issues, implemented **caching strategies** and data transformations, optimized database queries, and scaling strategies to enhance backend performance and system reliability.
- Mentored 10+ external agencies developers and internal teams in **Drupal best practices**, creating a reusable knowledge base reducing go-live delays.
- Led the **SSO migration to Microsoft Entra** (Active Directory), alerts policy enforcing (New Relic Synthetic Monitoring), code reviews, feature breakdowns, Drupal queue's optimization, ensuring 100% adherence to Nestlé's maintainability standards.

MACHINE LEARNING ENGINEER

Envato | 09/2022 – 12/2022

- Architected the decoupling of Vision Transformer model for edge inference on AWS SageMaker using Kubernetes operators, optimizing ONNX Runtime to improve edge AI model performance and scalability.
- Developed **middleware** to seamlessly integrate AI models with content applications. Developed intelligent caching layer and offloading to reduce latency, cloud processing costs and improving inference speed.
- Engineered **AI workflows** (Kubeflow, Docker) for packaging and deploying edge vision models, for inference efficiency and production rollout.
- Designed **CI/CD deployment pipelines** (AWS CodePipelines), incorporating A/B testing and shadow deployments to ensure seamless updates with minimal risk.

SR. APIGEE ENGINEER

UST | 08/2022 – 11/2022

- Built **API proxies** in Apigee Edge, optimized traffic management, **OAuth 2.0**, and **JWT** authentication.
- Implemented rate limiting, IP filtering, and threat protection policies, reducing unauthorized access attempts and ensuring regulatory aligned data flows.
- Automated **API deployment** and versioning with **CI/CD pipelines** (Jenkins, GitLab CI) with rollback capabilities, cutting release cycles and enabling zero-downtime rollbacks for mission-critical systems.
- Reduced latency by refining proxy logic, **caching strategies**, and backend service orchestration.
- Integrate Apigee with **monitoring** tools (New Relic, Splunk), improving incident response times.

MARIA RABELERO

SR DRUPAL BACKEND DEVELOPER

DRUPAL FULLSTACK DEVELOPER & DRUPAL TECH LEAD

TrueLogic | 11/2021 – 06/2022

- Architected and delivered **15+ multisite and decoupled Drupal systems** for global clients, integrating headless frontends (Gatsby, React.js, Vue.js) with REST/JSON:API, and various service providers, cloud platforms, reducing backend response times, leading to an increase in scalability.
- Implemented advanced **caching strategies** (Varnish, Memcached, CDN caching), queue workers, coupled with database tuning (MySQL, PostgreSQL), cutting page load times, achieving an improvement in site performance for sites averaging 2M+ monthly visits accommodating a surge in user traffic.
- Configured **CI/CD pipelines** (GitLab CI, Acquia BLT, Pantheon WebOps) to standardize deployments across 20+ environments, reducing rollout failures and deployment time.
- Built **custom modules** for critical business applications, to unify third-party APIs (SFMC, CRM, OMNI) with Drupal backend services, enabling real-time data synchronization, enhancing system capabilities.
- Diagnosed and patched high-impact production **bottlenecks** (PHP opcode, query optimization) and security issues, eliminating system stability and timeout errors, and hardening sites against critical vulnerabilities.

PRINCIPAL APPLICATIONS ENGINEER

Oracle | 04/2018 – 11/2021

- High-performance **middleware** development (Java, Spark, Seldon) that seamlessly integrated ML models into enterprise applications, via Kubernetes orchestration, with embedded security (encryption, access controls), enhancing real-time AI-driven insights, while meeting fintech compliance standards.
- Developed Solr-based Search **API**, automated testing, and automating collection management (Bash/Python), achieving zero-downtime upgrades for multi-tenant systems.
- Built container-based **CI/CD Pipelines** (Jenkins) for the API's (Docker, Helm Charts, Solr), ELT (HBase, SQL) and model training (Python), ensuring monitoring of models in production, reducing deployment times and failures by 95% and enhancing system scalability.
- Integrated **big data processing** frameworks, Solr, HBase and Spark, into **data ingestion pipelines**, significantly improving the efficiency of unstructured data handling. Reducing data processing time.

SR. DRUPAL WEB ADMINISTRATOR

Baxter | 02/2018 – 05/2018

- Deployed and managed **100+ Drupal sites** via Acquia Cloud Site Factory, streamlining multisite management and reducing deployment time through **BLT and Pipelines automation**. Ensuring SLA's in uptime for mission-critical healthcare sites, while maintaining rigorous documentation for compliance and knowledge sharing.
- Administered thousands of **content assets, custom themes** (Twig), **custom modules** using Acquia DAM and Lift, enhancing content delivery efficiency.
- Configured JIRA and Confluence **workflows** for task tracking, improving team productivity by 50% and ensuring on-time delivery of 50+ site enhancements.
- Coordinated task assignments and monitored deliverables across teams and agencies, providing daily updates and comprehensive weekly status reports to stakeholders.

SENIOR DRUPAL ENGINEERING TEAM LEAD

Accenture | 07/2015 – 02/2018

- Architected, developed and optimized complex **50+ Drupal multi-sites**, handling millions of users, implementing complex business rules, taxonomy-driven content, and granular access controls.
- Implemented **Pantheon Search** (Solr) with advanced faceting for Autodesk's Developer Portal, developing custom search features. Developed custom modules integrating Salesforce, Jira, and Apigee Edge **APIs**, integrating them in form submissions.
- Architected **RSA encryption and key management** solution for Marriott using Townsend Security, meeting PCI DSS requirements. Hardened production environments through automated security patching and network configuration, eliminating critical vulnerabilities.
- Migrated Coors from ASP.NET MVC to Drupal and SVN to GitLab while maintaining 100% data integrity.
- Automated deployment **CI/CD pipelines** across 30+ client environments, reducing production incidents by 90%.

MARIA RABELERO

SR DRUPAL BACKEND DEVELOPER

- Designed and deployed containerized on-premise environments (Ubuntu, Solr, MySQL, Apache HTTP) for AT&T, achieving SLA uptime for mission-critical knowledge management systems.
- Streamlined **image and content management** for Marriott's Meetings Imagined Site. Led the migration of over 10,000 media assets while redesigning SEO strategy, ensuring zero downtime during the process.
- Automated **approval workflows** and optimized image metadata for an increase in site traffic.

TELECOMMUNICATIONS COORDINATOR

CITI | 03/2015 – 07/2015

- Architected and oversaw telecommunications systems for financial data transmission, ensuring availability for mobile money transfers. Developed technical diagrams and specifications for network installations, improving data flow efficiency.
- Analyzed system performance metrics and implemented strategic improvements that **reduced latency**. Served as primary technical liaison between banks and service providers, resolving integration issues.
- Spearheaded procurement and deployment of network equipment, completing installations under budget. Established standardized **troubleshooting protocols**, reducing mean-time-to-resolution.

FRONT-END WEB DEVELOPER

Schibsted | 09/2014 – 12/2014

- Developed **WCAG-compliant**, cross-browser interfaces for classifieds platforms, improving UX scores through semantic HTML/CSS refactoring.
- Design RESTful data contracts, reducing API-related UI bugs and accelerating feature delivery.
- Refactored legacy templates to **W3C standards**, enabling easier theming integration and cutting technical debt for future teams.
- Implemented automated A/B testing and cross-browser validation (Capybara, Selenium), increasing feature rollout confidence and reducing production hotfixes.

FREELANCE PROJECTS

DRUPAL FULL-STACK DEVELOPMENT

Private Services Website | 10/2013 – 01/2014

- Designed and implemented custom **Drupal 7 user permission workflows** with granular file management (PDFs, images), establishing secure access controls for sensitive data.
- Configured local environment with Vagrant, PuPHPet (Debian, Nginx) and **automated workflows** (Composer), using Yeoman (Grunt, Bower), reducing setup.
- Enabled seamless single-page app behavior with parallax animations (jQuery, **HTML5**, **CSS3**) while maintaining <1s load times.
- Implemented version control (Git) creating a foundation for scalable, maintainable code.

DRUPAL FULL-STACK DEVELOPMENT

Medical Office Website | 05/2013 – 08/2013

- Implemented **Drupal 7 role-based access control** for medical assistants and medical staff, creating custom permission levels to protect sensitive patient data (PHI compliance precursor).
- Built appointments **custom module** with AJAX backend calls to MySQL, reducing scheduling conflicts by and improving patient booking completion rate.
- **Automated** form updates and appointment verification through jQuery, MySQL integration, cutting administrative processing time for medical staff.
- Configured HIPAA-aligned local stack (Vagran, Ubuntu, Apache) with Git version control, implementing **security best practices** for healthcare data handling.

MARIA RABELERO

SR DRUPAL BACKEND DEVELOPER

SYMFONY WEB DEVELOPMENT

Security Company E-Commerce Website | 02/2013 – 04/2013

- Developed **Symfony2** backend with user authentication with custom permissions, reducing fraudulent registrations through rigorous input validation and session management.
- Use Silex for the front end. Configured Google Analytics with custom event tracking. Automated frontend builds with Grunt and Bower. Maintaining PCI-compliant security standards.
- Implemented Magento Shop with data synchronization. achieving high order accuracy and inventory tracking.

FRONT-END DEVELOPMENT

GSC2012 Website | 06/2012 – 07/2012

- Developed polyfill-supported JavaScript components achieving 100% functionality in legacy browsers (IE6+), demonstrating deep understanding of browser-specific backend integration challenges.
- Implemented DataTables.js with optimized backend data fetching, while displaying 500+ conference papers with instant search/sort functionality.
- Designed jQuery **UI theme** system with modular CSS architecture with component reuse.
- Configured **Grunt-based build system** with Mercurial version control, creating foundation for automated deployment workflows that increased development.

EDUCATION

MASTER IN APPLIED ARTIFICIAL INTELLIGENCE

Instituto Tecnológico y de Estudios Superiores de Monterrey
2023 – 2026

BACHELOR OF INFORMATION AND COMMUNICATION TECHNOLOGY, SPECIALIZED IN PROJECT MANAGEMENT

Universidad Tecnológica de Tijuana
2012 – 2014

LICENCE PROFESSIONNEL, SYSTÈMES INFORMATIQUES ET LOGICIELS, SPÉCIALITÉ SÉCURITÉ INFORMATIQUE

Institut Universitaire de Technologie de Lens
2011 – 2012

ASSOCIATE OF INFORMATION AND COMMUNICATION TECHNOLOGY, SPECIALIZED IN NETWORKING AND TELECOMMUNICATIONS

Universidad Tecnológica de Tijuana
2009 – 2011

CONFERENCES AND COURSES

2015 DrupalCamp Mexico City

2020 DrupalCon Global

2023 DrupalCon Lille

2024 DrupalCon Barcelona

2025 Acquia Academy – Drupal Site Builder Certification Learning Plan

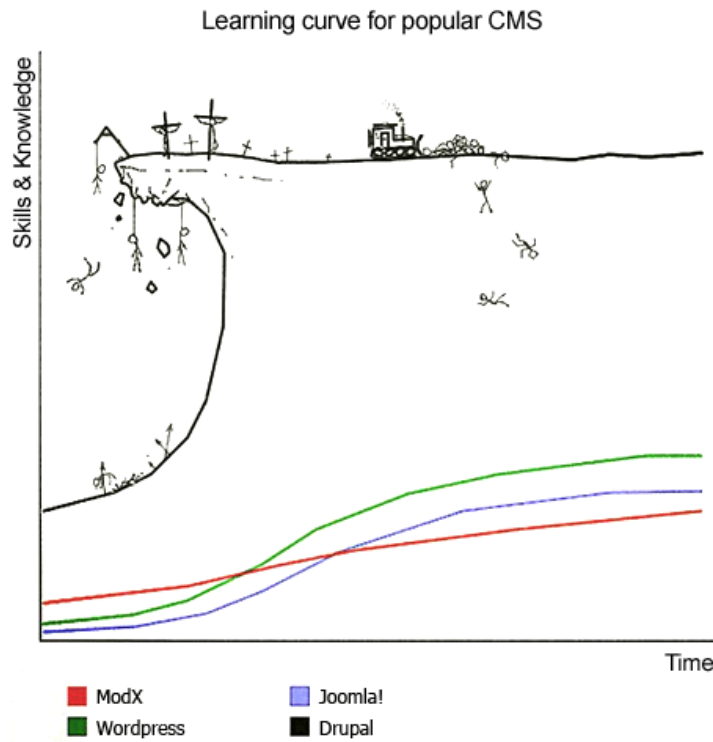

2025 Acquia Academy – Drupal Front End Specialist Certification Learning Plan

2025 Acquia Academy – Drupal Developer Certification Learning Plan
